

Art, D.T. and Music

In art, we will be working on self-portraits and careful observation. The children will be exploring descriptive sounds and how they could recreate these using different instruments.

English

The children will be reading and writing stories with a familiar setting and will begin to use the success criteria to plan out their independent writing. As well as this, the children will write a report based on what they have been taught about the weather. The children will have a spelling lesson once a week and this will involve being tested on their spellings and also learning a different spelling rule. We will be reading 'Thomas & the Tinnets'.

M.F.L.

The children will be given an introduction to French – they will start with basic greetings and numbers and then progress with this throughout the year.

Computing

The children will program an animation, as well as finding and correcting bugs in programs.

PE (Tuesday & Thursday)

The children will have two P.E sessions a week. This term, the children will be taught tag-rugby and football skills.

Year 3 Term 1 Coasts

Geography and History

The children will study different coastal regions and the habitats which can be found there. Also, they will learn basic mapping skills through the use of atlases and learn the main countries and capital cities of Europe.

Science

This term the children will be looking at rocks and soils. The children will investigate different materials and understand if they are formed naturally or if they are man-made. They will also look at different types of rocks and compare or group them according to their properties.

P.S.H.E.

We will be looking at the new beginnings that the children are making this year at school and setting personal goals. We will also be thinking about the Environment and the importance of recycling.

R.E.

The children will be looking at the main festivals, events and seasons celebrated in a 'Church Year'

Maths

This term we will be focusing on the core mathematical skills on which further skills are built. This includes place value, sequences and patterns, addition and subtraction. We will be building on our knowledge of the properties of shapes. This term we are revising the 2, 5 and 10 times tables.
